Make a clean getaway with the Easy+Clean™ Facility Furniture from UNION.

**EASY+CLEAN™: EASY TO OPEN AND CLEAN TO USE**

To assist in protecting people against the threat of bacterial infection, UNION has launched Easy+Clean™ Facility Furniture combining an easy access design, with new TouchClean® technology.

Due to the nature of its use in toilet and bathroom applications, facility furniture will undoubtedly come into contact with bacteria. TouchClean® anti-bacterial coating helps to improve infection control and reduce the risk of bacteria being transmitted from the surface of the ironmongery.
What does TouchClean® do?

TouchClean® is a nanotechnology coating used to protect people against bacteria and mould organisms. Examples include MRSA, C. Difficille, E. Coli, SARS, listeria, salmonella and bacterial spores. TouchClean® will stop contaminants from growing and tests have shown that within 24 hours, colonies of bacteria were reduced by 99.99%.

Clean warm water is all that is needed to keep the surface clean, avoiding the use of environmentally unfriendly cleaning agents.

UNION Easy+Clean™ Facility Furniture is suitable for toilet and bathroom doors, both hinged and sliding, where ease of operation is desired. It assists in fulfilling duties required under the Equality Act (EA) and satisfies recommendations of BS8300 and Approved Document M (ADM).

Features and Benefits

- TouchClean® Anti-Bacterial Coating
- TouchClean® prevents contaminants from growing and quickly reduces them
- Red and white occupancy signal
- Coin operated emergency release
- Lever mechanism for ease of operation
- Bolt-through fixing - can be fitted directly to cubicle or flush panel door
- Exterior pull may be fitted at 90, 180, 270 or 360°
- Vertical position of lever handle bolts door, can be seen by occupant
- EN 1634-1 assessed for use on 60 minute fire doors
