

ASSA ABLOY Academy Training Prospectus

ASSA ABLOY

The global leader in
door opening solutions

Welcome to the ASSA ABLOY Academy

The ASSA ABLOY Academy is a purpose built training and product display centre, sited at the heart of ASSA ABLOY's UK manufacturing facilities, near Birmingham.

The ASSA ABLOY Academy, which opened in Autumn 2010, is a Centre of Excellence for both internal and customer training that enables us to share our knowledge and market insights with customers and end users alike.

Equipped with the latest video conferencing and IT facilities, the ASSA ABLOY Academy has a number of different spaces suitable for classroom, lecture theatre, group study or individual learning.

The specially equipped Academy workshop also offers product installation training.

Training courses can also be combined with visits to our on site manufacturing cells. This combination of theory and practical examples helps bring the learning experience alive.

ASSA ABLOY Training Courses

Various ASSA ABLOY sales divisions host a series of training courses at the state of the art ASSA ABLOY Academy in Willenhall.

These sales divisions include:

- ASSA ABLOY Access Control; at the leading edge of access control solutions integrating with third party OEM's.
- ASSA ABLOY Security Doors; manufacturers of high-performance steel and timber doors.
- ASSA ABLOY Security Solutions; supporting their distribution partners through leading ironmongery brands such as Adams Rite, ASSA, Trimec, Pemko and UNION.
- AAUK Specification; Supporting architects and contractors with value added solutions.

All ASSA ABLOY training courses are run by qualified industry experts.

Our courses are targeted at specifiers, architects, main contractors, locksmiths, AI's, retailers and end users. We also offer a number of courses accredited by the Royal Institute of British Architects (RIBA).

Events cover a wide range of technical, legislative and product related issues including standards compliance, CPD events and new products.

For further information on the courses available, please see the following pages.

ASSA ABLOY Access Control

ASSA ABLOY Access Control

Keyless Access Solutions

Who should attend? End users, security managers/consultants and specifiers

The seminar gives an introduction into how keyless access solutions work and how and when they are best used.

When attending this CPD you will gain a better understanding of keyless access solutions and the technology involved, the different types of products their uses and benefits, and the standards and regulations that affect these products.

Aperio® Access Control

Who should attend? Access Control manufacturers, Installers, Locksmiths, Specifiers, Engineers

This one day course covers Aperio® product overview, hardware features, an overview of different Aperio® versions and principles of operation, Aperio® products specification, PAP Software installation and configuration.

This course also illustrates software features including configuration of wireless hub and pairing Aperio® devices.

ASSA ABLOY Security Doors

Steel Doors and Windows; Performance and Specification considerations

Who should attend? Architects, contractors, end users, security managers/consultants and specifiers

This seminar is a genuine learning experience and has been developed to help clarify the important issues to consider when specifying doors.

The seminar covers topics including performance specification considerations, current Equality Act regulations, fire door legislation and security and blast door ratings.

It also provides best practice advice on door and frame installation, the design of structural openings, hardware selection and door accessories.

ASSA ABLOY UK Specification

Demystifying Ironmongery

Who should attend? Architects, contractors, end users, security managers/consultants and specifiers

This seminar will help understand the basic principles for the successful specification of architectural ironmongery. The module touches on how to hang, close, lock, open and dress a door and discussion centres around many external stimuli such as DDA, Part M, Part B and the Equality Act.

Learning aims:

Gain a better understanding of the terminology and phrases used when specifying architectural ironmongery. Gain an understanding of how to specify architectural ironmongery. Obtain an insight into the standards and regulations that affect architectural ironmongery.

ASSA ABLOY UK Specification

Doorsets & CE marking in 2015: The implications for architects

Who should attend? Architects, contractors, end users and security specifiers

In July 2013 the creation of the CE marked doorset will have a significant impact on the way doors and ironmongery will be supplied in the UK and abroad.

The purpose of this seminar is to explain the differences between a door assembly and a doorset.

This CPD demonstrates the benefits of doorsets and analyses the impact of 2013 CE marking changes on doorsets and door assemblies.

This seminar also identifies the standards affecting CE marked doorsets.

ASSA ABLOY UK Specification

Opening your eyes to Door Controls, A Guide for Architects

Who should attend? Architects, contractors, door manufacturers, doorset installers

This seminar explains the different Door Controls available and where they are best placed. It also considers types of products that can help to ensure compliance with required standards.

The seminar also considers forthcoming changes in legislation and how these might affect specification and the effects they may have on building safety and security.

ASSA ABLOY UK Specification

Influencers in the Specification of External Doorsets

Who should attend? Door manufacturers, doorset Installers, distributors, specifiers of perimeter doors

This course will provide you with an understanding of the current market drivers effecting the specification of perimeter doors in the UK. The course also provides an overview of the current legislative developments relating to your market.

Topics covered include guidance and support on the correct specification of hardware to meet both Secured by Design and the Equality Act as well as the responsibilities of the door set manufacturer when placing product on the market.

You will also be given the opportunity to visit the ASSA ABLOY UKAS accredited test facility.

ASSA ABLOY Security Solutions

ASSA Architectural Ironmongery Diploma

Who should attend? FOR ASSA STOCKISTS ONLY

This 3 day seminar, for ASSA stockists only, will show students how to create complete ironmongery specifications and learn about the latest trends in product R&D.

This course provides ASSA stockists:

- Everything you need when specifying architectural ironmongery projects
- Product training on ASSA mechanical and electromechanical lockcases, cylinders, master key systems, door furniture, door closers, exit hardware and hinges.

ASSA ABLOY Security Solutions

Master Key System Assembly & Combination Counting

Who should attend? FOR ASSA STOCKISTS ONLY

This 2 day seminar, for ASSA stockists only, will show students how to create simple or complex master keyed cylinder systems by hand or using computer software.

This course is designed specifically for ASSA stockist personnel who work in cylinder production / assembly areas and who are involved in the creation / management of master key system records.

ASSA ABLOY Security Solutions

A Guide to Master Keying

Who should attend? Locksmiths, AI's and security specifiers

In its simplest form a master key system allows each key holder to access pre-designated doors within a building.

To help locksmiths, AI's and security specifiers understand more about master keying, UNION have developed a CPD seminar.

The UNION master keying CPD will:

- Convey an appreciation of the cylinder mechanism and how it works
- Familiarise you with latest European Standards
- Describe cylinder features and physical security
- Demonstrate how varying levels of security and user convenience can be achieved by using a key control system.

Course availability and duration

The majority of our seminars will take less than an hour (excluding a factory tour) with the exception of the ASSA Diploma, ASSA combination counting course and UNION master keying courses.

Please check with our CPD co-ordinator with regards to timings and availability before booking.

Course charges

With the exception of the ASSA Diploma and ASSA Cylinder counting course (charges only apply to non-attendance) all our courses are free of charge. Refreshments, including lunch where applicable, will be also be provided

How to book
